Objective

I am a computer science graduate who has a strong interest in leveraging data to drive operational efficiency. I enjoy working with Python, SQL, and other data tools to transform complex information into actionable insights that help guide a company's decisions to enhance product performance and optimize operations.

Education

Texas State University

San Marcos, TX

Computer Science Bachelors of Science

Relevant Coursework: Database Management, Software Engineering Projects, Machine Learning

Skills & Interests

Certificates: The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert

Programming Languages and Computer Skills: Python, Java, MS Office, GIT, SQL, MySQL, ClaudeAI, Tableau

Interests: Working out, Manga art, Watching anime and other media

Soft Skills: Leadership, Problem-Solving, Working Well Under Pressure, Time Management

Experience

Tesla

Austin, Texas

Autopilot Engineer

April 2026 - Current

- Logged more than 10,000 miles of real-world autonomous vehicle testing across highway, urban, and adverse-weather conditions, executing standardized evaluation protocols and intervening during safety critical edge cases.
- Built and maintained structured driving session datasets, flagging and correcting inconsistencies to sustain data accuracy for downstream software validation and ML model training.
- Analyzed testing results to identify trends in autonomous driving performance, assigned standardized post-drive ratings, and communicated findings with software engineers and cross-functional teams to improve testing workflows and enhance autonomous driving capabilities

Starbucks

Pflugerville, Texas

Barista

December 2024 - Current

- Conducted data validation and root-cause analysis on order, payment, and inventory records to ensure accuracy, consistency, and reliable reporting.
- Built a Tableau dashboard tracking waiting time, order accuracy, and customer satisfaction, surfacing bottlenecks that shift leads used to adjust staging during peak hours.
- Defined and monitored key performance indicators including service latency, error rates, and customer satisfaction to evaluate operational effectiveness and inform resource allocation decisions.

Revature Training Program

Alexandria, Virginia (Remote)

Programmer in Training

January 2025 - March 2025

- Utilized Git, GitHub, and CI/CD pipelines for source control and project collaboration, ensuring seamless integration with cross-functional teams in a DevOps-driven environment.
- Developed and deployed scalable applications using Java, Spring Boot, SQL, and RESTful APIs, following Agile/Scrum methodologies to enhance collaboration and sprint efficiency.
- Applied data structures, algorithms, and object-oriented programming (OOP) principles to build optimized solutions, debugging and refactoring code to improve application performance.

Extracurriculars

National Society of Black Engineers (NSBE)

San Marcos, TX

Senator

August 2023 - August 2024

- Represented member interests by collecting, analyzing, and communicating feedback and participation data to help guide organizational priorities, and policy decisions.
